Introduction

Introducing Stake Busd Binance Smart Chain contract - an immutable, redesigned fork of Baked Beans 2.0 using BUSD.

What's new?

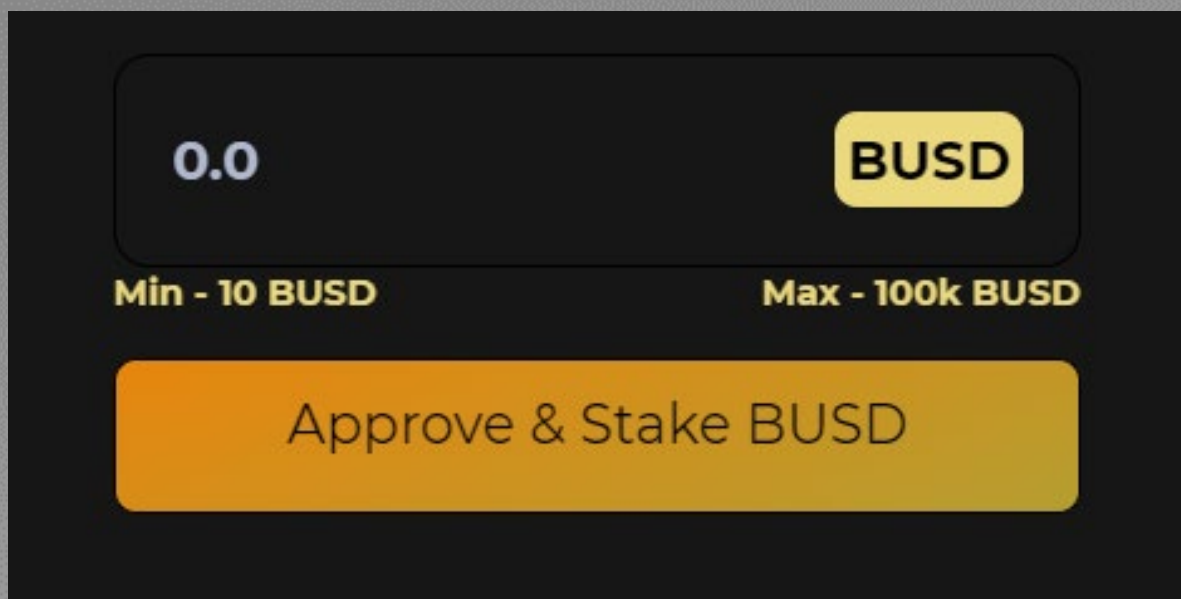

- 1. Contract is fully decentralized, immutable and audited.**
- 2. Stake BUSD uses BUSD instead of BNB**
- 3. Slightly increased daily return to 5% - 8%**

How to Access

Stake BUSD is a dApp (decentralized application) that can be accessed through a Web3 browser or wallet extension, such as Metamask or Trust Wallet. It is important to use verified links and never share your seed phrase with anyone. The dApp has three basic functions: investing (Approve & Stake Busd), compounding your investment (Re-Invest), and earning money (Claim Profit)

Approve & Stake BUSD

When you use the dApp to invest your BUSD, the smart contract will deposit it into the Total Value Locked (TVL) and lock it. You will receive "stakes" that represent your ownership of tokens, which will generate passive income. First enter your amount, click Approve & Stake BUSD (2 transactions).

A screenshot of a dApp interface for staking BUSD. The interface is dark-themed. At the top, there is a rounded rectangular input field containing the number "0.0" on the left and a yellow button labeled "BUSD" on the right. Below the input field, the text "Min - 10 BUSD" is displayed on the left and "Max - 100k BUSD" is displayed on the right. At the bottom of the interface is a large, prominent yellow button with the text "Approve & Stake BUSD".

Re-Invest

The re-invest function allows you to compound your current rewards. You must have at least 1 BUSD in rewards before using this function. Once you have enough rewards, you can use the "Re-Invest" button to invest them into the locked TVL. This will reset your rewards counter to zero and increase the number of "stakes" you have, based on the amount in the TVL and the number of rewards you compounded.

Claim Profit

The Claim Profit function allows you to withdraw your BUSD from the dApp to your wallet. The amount you receive will vary depending on the day you choose to withdraw, as explained on the next page.

Claim Tax

- Day 1 – Claim Profit incurs 85% Tax (0-24 hours)
- Day 2 – Claim Profit incurs 75% Tax (25-48 hours)
- Day 3 – Claim Profit incurs 65% Tax (49-72 hours)
- Day 4 – Claim Profit incurs 55% Tax (73-96 hours)
- Day 5 – Claim Profit incurs 45% Tax (97-120 hours)
- Day 6 – Claim Profit incurs 35% Tax (121-144 hours)
- Day 7 – Claim Profit incurs 25% Tax (145-168 hours)
- Day 8 – Claim Profit incurs 15% Tax (169-192 hours)
- Day 9 – Claim Profit incurs 5% Tax (193-216 hours)
- Day 10 – No Loss incurs | Standard fees (216-240 hours)
- Day 11 – Resets back to Day 1

New deposits during a certain time period will reset your timer back to Day 1 and trigger a round of community giveaways, where taxes will be fully distributed to participating members. Get in on the action and score some free BUSD!

Standard Referrals

Referr friends and receive an instant 5% one-time bonus worth of beans into your account, regardless of their deposit amount.

Staketastic Referrals

Every referral with a deposit over 100 BUSD will count as "Staketastic". Staketastic referrals increase your daily return.

- 0-4 Staketastic referrals - 5% total daily rewards
- 5-9 Staketastic referrals - 5.5% total daily rewards
- 10-19 Staketastic referrals - 6% total daily rewards
- 20-29 Staketastic referrals - 6.5% total daily rewards
- 30-39 Staketastic referrals - 7% total daily rewards
- 40-49 Staketastic referrals - 7.5% total daily rewards
- 50+ Staketastic referrals - 8% total daily rewards

Other Metrics

Min-Max Invest: 10-100k BUSD

Min. Compound: 1 BUSD

Fees: 3% deposit and 4% withdrawal fees

Max Withdraw per Day: 5000 BUSD

Max ROI per Wallet: 300%.
